DETAILED ACTION

1. This action is responsive to the Preliminary Amendment filed on 10/23/07.

Claims 1-22 are pending in this application. Claims 1, 9, 19 and 21 are independent claims. In the instant Amendment, claims 4-6 were amended, and claims 20 and 22 were canceled. This action is Non-Final.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claim 19 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, specifically a software application. Computer programs claimed as computer code per se, i.e., the descriptions or expressions of the programs, are not physical "things," nor are they statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed aspects of the invention which permit the computer program's functionality to be realized. In contrast, a claimed computer readable medium encoded with a computer program defines structural and functional interrelationships between the computer program and the medium which permit the computer program's functionality to be realized, and is thus statutory. See MPEP §2106 Section IV.B.1(a).

Allowable Subject Matter

4. Claim 19 would be allowable if the rejection under 35 U.S.C. 101 is overcome.
5. Claims 1-18 and 20 are allowable over the art of record because the art of record does not disclose the recited limitations.
